Stakeholder List and Analysis

1. Ski Instructors

Relationship to Discourse Community:
Ski instructors are core members of the discourse community who deliver lessons, communicate directly with guests, and represent the ski school's instructional standards.

Interest in the Discourse Community:
They are interested in improving guest experience, advancing their teaching skills, earning certifications (such as PSIA), and maintaining consistent work opportunities and income.

Power in the Discourse Community:
Ski instructors hold moderate power. They control lesson quality and guest interaction, but they do not control terrain access, safety decisions, or operational policies.

2. Ski Patrol

Relationship to Discourse Community:
Ski patrol are operational members responsible for maintaining safety across the mountain, including responding to injuries and enforcing safety protocols.

Interest in the Discourse Community:
Their primary interest is minimizing risk, preventing accidents, and ensuring efficient emergency response.

Power in the Discourse Community:
Ski patrol hold high power. They have the authority to close terrain, override decisions made by instructors, and dictate safety procedures that all members must follow.

3. Mountain Operations

Relationship to Discourse Community:
Mountain operations include lift operations, snowmaking teams, and management staff who maintain the physical and logistical structure of the resort.

Interest in the Discourse Community:
They are focused on maximizing terrain availability, maintaining efficiency, managing weather-related challenges, and ensuring smooth guest flow throughout the mountain.

Power in the Discourse Community:
Mountain operations hold very high power. They determine which terrain and lifts are open, which directly affects instructors, patrol, and guests.

4. Guests / Clients

Relationship to Discourse Community:
Guests are external participants who engage with the discourse community through lessons and recreational use of the mountain.

Interest in the Discourse Community:
They are interested in learning to ski, staying safe, having an enjoyable experience, and receiving value for the cost of their visit.

Power in the Discourse Community:
Guests hold indirect but significant power. While they do not control operations, their satisfaction and spending influence business decisions, reputation, and demand.

5. Prospective Instructors / Trainees

Relationship to Discourse Community:
Trainees are peripheral members attempting to enter the discourse community by learning its practices, communication styles, and certification requirements.

Interest in the Discourse Community:
They are interested in gaining acceptance, developing skills, achieving certification, and becoming full members of the ski school.

Power in the Discourse Community:
Trainees hold low power. They must follow established norms and rely on instructors and leadership for training, evaluation, and entry into the community.

Stakeholder Relationships

The relationships between stakeholders demonstrate how power, communication, and influence operate within the discourse community.

- Mountain Operations → Ski Instructors, Ski Patrol, Guests
  Mountain operations control terrain availability, lift access, and overall conditions, shaping how all other stakeholders function.
- Ski Patrol → Ski Instructors and Guests
  Ski patrol enforce safety protocols and have the authority to override decisions in emergency or hazardous situations.

- Ski Instructors ↔ Guests
  This is a direct service relationship where instructors provide lessons and guidance, while guests provide feedback and financial support.
- Guests → Mountain Operations and Ski Instructors
  Guests influence decision-making through demand, satisfaction, and economic impact.
- Prospective Instructors → Ski Instructors
  Trainees rely on instructors for mentorship, learning, and integration into the discourse community.
